Data sheet

LOGO!Power/1AC/24VDC/2.5A

LOGO!POWER 24 V / 2.5 A Stabilized power supply input: 100-240 V AC output: 24 V DC/ 2.5 A *Ex approval no longer available*

Input	
type of the power supply network	1-phase AC or DC
supply voltage at AC	
 minimum rated value 	100 V
 maximum rated value 	240 V
initial value	85 V
• full-scale value	264 V
input voltage	
• at DC	110 300 V
design of input wide range input	Yes
overvoltage overload capability	300 V AC for 1 s
operating condition of the mains buffering	at Vin = 187 V
buffering time for rated value of the output current in the event of power failure minimum	40 ms
operating condition of the mains buffering	at Vin = 187 V
line frequency	
1 rated value	50 Hz
• 2 rated value	60 Hz
line frequency	47 63 Hz
input current	
 at rated input voltage 120 V 	1.22 A
 at rated input voltage 230 V 	0.66 A
current limitation of inrush current at 25 °C maximum	52 A
I2t value maximum	3 A ² ·s
fuse protection type	internal
• in the feeder	Recommended miniature circuit breaker: from 10 A characteristic B or from 6 A characteristic C
Output	
voltage curve at output	Controlled, isolated DC voltage
output voltage at DC rated value	24 V
output voltage	
 at output 1 at DC rated value 	24 V
relative overall tolerance of the voltage	3 %
relative control precision of the output voltage	
 on slow fluctuation of input voltage 	0.1 %
 on slow fluctuation of ohm loading 	0.1 %
residual ripple	
• maximum	200 mV
• typical	30 mV
voltage peak	

maximum	300 mV
• typical	50 mV
adjustable output voltage	22.2 26.4 V
product function output voltage adjustable	Yes
type of output voltage setting	via potentiometer
	•
display version for normal operation	Green LED for output voltage OK
behavior of the output voltage when switching on	No overshoot of Vout (soft start)
response delay maximum	0.5 s
voltage increase time of the output voltage	400
• typical	100 ms
output current	
rated value	2.5 A
rated range	0 2.5 A; +55 +70 °C: Derating 2%/K
supplied active power typical	60 W
product feature	
bridging of equipment	Yes
number of parallel-switched equipment resources for	2
increasing the power	
Efficiency	
efficiency in percent	90 %
power loss [W]	
 at rated output voltage for rated value of the output 	7 W
current typical	
during no-load operation maximum	0.3 W
Closed-loop control	
relative control precision of the output voltage with rapid fluctuation of the input voltage by +/- 15% typical	0.2 %
relative control precision of the output voltage at load step	2 %
of resistive load 10/90/10 % typical	
setting time	
load step 10 to 90% typical	1 ms
 load step 90 to 10% typical 	1 ms
- load step so to 1070 typical	
Protection and monitoring	
	Yes, according to EN 60950-1
Protection and monitoring	
Protection and monitoring design of the overvoltage protection	Yes, according to EN 60950-1
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof	Yes, according to EN 60950-1 3.2 A
Protection and monitoring design of the overvoltage protection response value current limitation typical	Yes, according to EN 60950-1 3.2 A Yes
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection	Yes, according to EN 60950-1 3.2 A Yes
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic resource protection class	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor)
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic resource protection class	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor)
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor)
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor)
design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor) IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273,
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability • CE marking	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms - 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor) IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259;
Protection and monitoring design of the overvoltage protection response value current limitation typical property of the output short-circuit proof design of short-circuit protection enduring short circuit current RMS value • maximum overcurrent overload capability in normal operation display version for overload and short circuit measuring point for output current overcurrent overload capability when switching on Safety galvanic isolation between input and output galvanic isolation operating resource protection class protection class IP Approvals certificate of suitability • CE marking • UL approval	Yes, according to EN 60950-1 3.2 A Yes Constant current characteristic 3.2 A overload capability 150% lout rated typ. 200 ms 50 mV =^ 2.5 A 150% lout rated typ. 200 ms Yes Safety extra-low output voltage Uout acc. to EN 60950-1 and EN 50178 Class II (without protective conductor) IP20 Yes Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273, NEC class 2 (acc. to UL 1310) Yes; cULus-Listed (UL 508, CSA C22.2 No. 107.1), File E197259; cURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273, CURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273, CURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273, CURus-Recognized (UL 60950, CSA C22.2 No. 60950), File E151273,

NEC Class 2	Voc
	Yes
ULhazloc approval FM as gistastica.	No No
FM registration Type of partification CP partificate	No Yes
type of certification CB-certificate	Tes
certificate of suitability	Voo
EAC approval	Yes
certificate of suitability shipbuilding approval	Yes
shipbuilding approval	ABS, BV, DNV GL, LRS
Marine classification association	v.
American Bureau of Shipping Europe Ltd. (ABS)	Yes
 French marine classification society (BV) 	Yes
• DNV GL	Yes
 Lloyds Register of Shipping (LRS) 	Yes
Nippon Kaiji Kyokai (NK)	No
EMC	
standard	
for emitted interference	EN 55022 Class B
 for mains harmonics limitation 	not applicable
 for interference immunity 	EN 61000-6-2
environmental conditions	
ambient temperature	
 during operation 	-25 +70 °C; with natural convection
 during transport 	-40 +85 °C
during storage	-40 +85 °C
environmental category acc. to IEC 60721	Climate class 3K3, 5 95% no condensation
Mechanics	
type of electrical connection	screw-type terminals
• at input	L, N: 1 screw terminal each for 0.5 2.5 mm2 single-core/finely stranded
• at output	+, -: 1 screw terminal each for 0.5 2.5 mm²
 for auxiliary contacts 	
width of the enclosure	54 mm
height of the enclosure	90 mm
depth of the enclosure	53 mm
required spacing	
 ◆ top 	20 mm
• bottom	20 mm
• left	0 mm
• right	0 mm
net weight	0.2 kg
product feature of the enclosure housing can be lined up	Yes
fastening method	Snaps onto DIN rail EN 60715 35x7.5/15, direct mounting in different mounting positions
MTBF at 40 °C	2 864 520 h
other information	Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)
