SITOP SEL1400/8X1-5A

SITOP SEL1400 5 A selectivity module 8-channel with limiting characteristic input: 24 V DC/40 A output: 24 V DC/8x 5 A threshold adjustable 1-5 A with monitoring interface *Ex approval no longer available*

type of the power supply network supply voltage at DC rated value input voltage at DC overvoltage overload capability input current at rated input voltage 24 V rated value Voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection Controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 5 A 1 5 A 1 5 A Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set vin DIP switch for sequential connection		
input voltage at DC overvoltage overload capability input current at rated input voltage 24 V rated value Output voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current-dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection 20.4 30 V 35 V 40 A Controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 5 A 1 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via potentiometer."		
overvoltage overload capability input current at rated input voltage 24 V rated value Output voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection 35 V 40 A Controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 5 A 1 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
input current at rated input voltage 24 V rated value Output voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection output current at rated input voltage 24 V rated value controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
Voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set vi		
voltage curve at output formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection controlled DC voltage Vin - approx. 0.2 V In accordance with the supplying input voltage 8 1 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
formula for output voltage relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection Vin - approx. 0.2 V In accordance with the supplying input voltage 8 1 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
relative overall tolerance of the voltage note number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection In accordance with the supplying input voltage 8 1 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
number of outputs output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection 8 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
output current up to 60 °C per output rated value adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection 5 A 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
adjustable current response value current of the current- dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection 1 5 A via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
dependent overload release type of response value setting product feature parallel switching of outputs type of outputs connection via potentiometer Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set via		
product feature parallel switching of outputs type of outputs connection Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set v		
product feature parallel switching of outputs type of outputs connection Yes Connection of all outputs after ramp-up of the supply voltage > 20 V; delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set vi		
delay time of 25 ms, 200 ms, 500 ms or "load-optimized" can be set vi		
Efficiency		
efficiency in percent 98 %		
power loss [W] at rated output voltage for rated value of the output current typical		
Switch-off characteristic per output		
switching characteristic		
• of the excess current lout = 1.01.5 x set value, switch-off after approx. 5 s		
• of the current limitation lout = 1.5 x set value, switch-off after typ. 100 ms		
• of the immediate switch-off lout > set value and Vin < 20 V, switch-off after approx. 0.5 ms		
design of the reset device/resetting mechanism via sensor per output		
remote reset function Non-electrically isolated 24 V input (signal level "high" at > 15 V)		
Protection and monitoring		
fuse protection type at input 8 A per output (not accessible)		
display version for normal operation Three-color LED per output: green LED for "Output switched through" yellow LED for "Output switched off manually"; red LED for "Output switched off due to overcurrent"		
design of the switching contact for signaling function Floating common signal contact or status signal output (pulse/pause signal that can be evaluated via SIMATIC function block)		
Safety		
galvanic isolation between input and output at switch-off No		
standard for safety according to EN 60950-1 and EN 50178		
operating resource protection class Class III		
protection class IP IP20		

Approvals		
certificate of suitability		
CE marking	Yes	
• UL approval	Yes; UL-Recognized (UL 2367) File E328600; cULus-Listed (UL 508, CSA C22.2 No. 107.1) File E197259	
CSA approval	Yes; CSA 22.2 60950-1	
• ATEX	No	
certificate of suitability		
• IECEx	No	
type of certification CB-certificate	Yes	
certificate of suitability		
EAC approval	Yes	
EMC		
standard		
 for emitted interference 	EN 61000-6-3	
 for interference immunity 	EN 61000-6-2	
environmental conditions		
ambient temperature		
 during operation 	-25 +70 °C; with natural convection	
 during transport 	-40 +85 °C	
 during storage 	-40 +85 °C	
environmental category according to IEC 60721	Climate class 3K3, 5 95% no condensation	
Mechanics		
type of electrical connection	Push-in	
at input	24V1, 24V2: push-in for 0.5 16 mm²; 0V1, 0V2: push-in for 0.5 4 mm²	
• at output	1 - 8: push-in for 0.5 4 mm²	
 for signaling contact 	13, 14: push-in for 0.2 1.5 mm ²	
 for auxiliary contacts 	RST: push-in for 0.2 1.5 mm ²	
width of the enclosure	45 mm	
height of the enclosure	135 mm	
depth of the enclosure	125 mm	
installation width	45 mm	
mounting height	225 mm	
required spacing		
• top	45 mm	
• bottom	45 mm	
• left	0 mm	
• right	0 mm	
net weight	0.3 kg	
fastening method	Snaps onto DIN rail EN 60715 35x7.5/15	
other information	Specifications at rated input voltage and ambient temperature +25 °C (unless otherwise specified)
