Converter losses	to IEC61800-9-2*
Efficiency class	IE2
Comparison with the reference converter (90% / 100%)	36.2 %

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

\*converted values

 $<sup>^{1)}</sup>$  The output current and HP ratings are valid for the voltage range 440V-480V
