

## **Data sheet for SINAMICS G120X**

Article No.: 6SL3220-3YE44-0AF0

Client order no. : Order no. : Offer no. : Remarks :

### Overload capability

Low Overload (LO)

110% base load current IL for 60 s in a 300 s cycle time

High Overload (HO)

Communication

150% x base load current IH for 60 s within a 600 s cycle time

| General tech. specifications      |                                               |
|-----------------------------------|-----------------------------------------------|
| Power factor λ                    | 0.90 0.95                                     |
| Offset factor $\cos\phi$          | 0.99                                          |
| Efficiency η                      | 0.97                                          |
| Sound pressure level (1m)         | 72 dB                                         |
| Power loss 3)                     | 2.610 kW                                      |
| Filter class (integrated)         | RFI suppression filter for Category C2        |
| EMC category (with accessories)   | Category C2                                   |
| Safety function "Safe Torque Off" | without SIRIUS device (e.g. via S7-<br>1500F) |
| Communication                     |                                               |

PROFINET, EtherNet/IP

|                           |                                                                 |  |

| Converter losses to IEC61800-9-2*                    |        |
|------------------------------------------------------|--------|
| Efficiency class                                     | IE2    |
| Comparison with the reference converter (90% / 100%) | 51.4 % |

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

\*converted values

 $<sup>^{1)}</sup>$ The output current and HP ratings are valid for the voltage range 440V-480V

<sup>&</sup>lt;sup>3)</sup>Typical value. More information can be found in the element group "Converter losses to IEC 61800-9-2" in this datasheet.
